

HOVE

MAINTAIN PORT CRANES SMARTER

Hove Carry

INTRODUCING HOVE CARRY

Hove Carry is a portable lubrication solution for ports. With a compact design, battery-powered pump, and digital interface, it gives you full mobility and easy tracking and documentation.

FULL MOBILITY

Get an ergonomic, lightweight, and battery-powered pump that is easy to use in all spaces and conditions.

A COMPLETE SOLUTION

Ensure correct lubrication and complete documentation in one unified solution.

REAL-TIME TRACKING

Reduce paperwork and support analytical, data-driven maintenance with easy-to-pull data.

REDUCED CLIMATE FOOTPRINT

Minimize lubricant consumption and increase bearing lifetime to reduce your climate footprint.

MEET A GAME-CHANGER

Lubricating port terminal equipment is working under unfavorable working conditions with long distances between lubrication points. This makes lubrication a time-consuming task with a large margin for error.

Hove Carry is tailor-made for ports. Carried as a backpack or walked as a dolly, it allows technicians to move freely wherever they need to. Its durable design gives you an efficient and reliable lubrication solution that changes the lubrication game for good.

INSIDE HOVE CARRY

- 1.** Powerful Hove grease pump, refined over decades for the wind turbine industry
- 2.** Innovative grease cartridge for easy refill
- 3.** Rechargeable Li+-Ion battery with easy recharge connection
- 4.** Hove Smart Lube PDA device for easy lubrication, tracking, and documentation
- 5.** Durable casing with dolly suitcase pull-up handle or backpack straps
